Summary

Java Full Stack developer experienced in Spring Boot microservices, REST APIs, and SQL. Built two microservice systems with service discovery, an API gateway, centralized configuration, and JWT authentication, and shipped an iOS app to the App Store. Brings 6+ years of prior lab QA and operations experience with a focus on testing, documentation, and reliability.

Skills

- **Languages:** Java, JavaScript, TypeScript, Swift, SQL, HTML, CSS
- **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate/JPA, Spring Cloud (Eureka, API Gateway, Config Server, OpenFeign), JDBC, REST APIs, JWT authentication
- **Frontend & Mobile:** Angular, React, React Native, Expo, Node.js
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Testing:** JUnit 5, Mockito, Postman, Swagger
- **Tools:** Git, GitHub, Maven, IntelliJ IDEA, Cursor, Claude Code
- **Concepts:** Microservices, OOP, layered architecture, Agile

Experience

Software Engineer — Beaconfire · Remote · Jan 2026 – Oct 2026

- Completed training in Spring Boot microservices, Spring Cloud, REST API design, and JWT-based authentication.
- Built two microservice applications during training (see Projects).

Technical Trainee — Revature · Remote · Feb 2025 – May 2025

- Completed intensive training in Java, JDBC, SQL, REST APIs, Git, and Agile methodologies.
- Built 2 Java back-end projects using JDBC, PostgreSQL, and REST principles with a layered architecture.
- Solved 200+ algorithm and SQL problems to strengthen problem-solving and technical interview skills.

Mycologist — MycoCulture · Weaverville, NC · Oct 2021 – Aug 2023

- Introduced substrate sterilization and humidity automation that raised yield ~15% and reduced contamination.
- Built sales partnerships with local restaurants and 3 farmers markets; managed inventory, orders, and deliveries.

Lab Analyst — FedUp Foods · Marshall, NC · Oct 2017 – Sep 2021

- Performed product testing and quality control using approved lab procedures and instruments (pH meter, spectrophotometer, colorimeter, autoclave).
- Maintained accurate test documentation to support quality and compliance standards.

Earlier: Assistant Audio Engineer, Orb Recording Studio, Austin, TX (2015–2016)

Projects

Employee Onboarding Portal · Beaconfire training, team of 5 · Spring Boot, Spring Cloud, MySQL, MongoDB, AWS S3

- Owned the Housing Service (Spring Boot, MySQL), building REST endpoints for HR to create, update, and delete houses with landlord and facility data, and for employees to view their assigned house and housemates.
- Built a facility maintenance reporting feature: employees file reports on house facilities, track status (Open → In Progress → Closed), and exchange comments with HR, with report lists sorted by date and paginated.
- Designed separate HR and employee endpoints, and called the Employee Service to resolve house assignments and housemate details across services.
- Worked within a 12-repo system using Eureka service discovery, an API gateway with JWT validation, a centralized Config Server, and S3 document storage; helped teammates debug and test endpoints with shared Postman collections.

Online Shopping App · Beaconfire training, solo · Spring Boot, Angular

- Designed and built a microservice application with separate authentication and shop services, plus an Angular frontend.

Messaging API · Java, Spring Boot, JDBC, PostgreSQL

- Built a REST API with 10+ endpoints supporting CRUD operations for user messages, with 90%+ unit test coverage.
- Added input validation, error handling, and standardized responses across all endpoints.

Time Catcher 2.0 · React Native, Expo, JavaScript · May 2025 – Jun 2025

- Built and published a minimalist iOS time-tracking app with single-tap clock-in/out and automatic weekly hour resets.
- Handled all development and the App Store submission; earned 5-star reviews in its first week.

inTune Pitch · Swift, iOS

- Built and published a free chromatic tuner app for guitar, bass, violin, and other instruments, with real-time pitch detection.
- Displays the detected note, frequency, and cents offset with visual guidance in a clean, beginner-friendly interface.

Education & Certifications

B.S., Recording Arts Technology — Full Sail University, Winter Park, FL · 2015

Full Stack Engineer Certificate — Codecademy · Jun 2024 – Sep 2024 (JavaScript, React, Node.js, SQL)

Software Engineering Coursework — App Academy · Jan 2024 – Jun 2024
