Summary

Java full-stack developer working in Spring Boot microservices, REST APIs, and SQL. Built two microservice systems, shipped two iOS apps to the App Store, and currently building a loan settlement platform with MongoDB and Docker. Brings 6+ years of lab QA experience focused on testing and reliability.

Skills

- **Languages:** Java, JavaScript, TypeScript, Python, Swift, SQL, HTML, CSS
- **Backend:** Spring Boot, Spring Security, Spring Data JPA & MongoDB, Hibernate, Spring Cloud, OpenFeign, REST, JWT
- **Frontend & Mobile:** Angular, React, React Native, Expo, Node.js
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git, GitHub, Maven, Docker, JUnit 5, Mockito, Postman, IntelliJ IDEA, Cursor, Claude Code
- **Concepts:** Microservices, concurrency, optimistic locking, OOP, layered architecture, Agile

Experience

Full-Stack Software Engineer (Training Program) — Beaconfire · Remote · Jan 2026 – Oct 2026

- Trained in Spring Boot microservices, Spring Cloud, REST, and JWT; built two microservice apps (see Projects).

Software Developer — Independent Projects · Remote · Nov 2024 – Present

- Build and publish personal projects: two App Store iOS apps and a Spring Boot settlement platform (see Projects).

Technical Trainee — Revature · Remote · Feb 2025 – May 2025

- Trained in Java, JDBC, SQL, and REST; built two back-end projects with PostgreSQL.

Mycologist — MycoCulture · Weaverville, NC · Oct 2021 – Aug 2023

- Introduced substrate sterilization and humidity automation that raised yield ~15% and reduced contamination.

Lab Analyst — FedUp Foods · Marshall, NC · Oct 2017 – Sep 2021

Projects

Dealer Settlement Platform · Personal project, in progress · Java 17, Spring Boot 4, MongoDB, Docker

- Four-service Spring Boot system for dealer loan settlement, with Docker Compose for MySQL, MongoDB, Redis, and Kafka.
- Concurrent loan import with CompletableFuture on a bounded thread pool, with per-loan results and idempotent re-imports.
- One MongoDB document per loan with Decimal128 money, optimistic locking, and audit timestamps; tested with @WebMvcTest and @DataMongoTest.

Employee Onboarding Portal · Beaconfire training, team of 5 · Spring Boot, Spring Cloud, MySQL, MongoDB

- Owned the Housing Service (Spring Boot, MySQL): REST endpoints for HR to manage houses, landlords, and facilities, and for employees to see their house and housemates via the Employee Service.
- Built facility maintenance reports with status tracking, HR comment threads, and pagination.

Online Shopping App · Beaconfire training, solo · Spring Boot, Angular

- Built a microservice app with separate auth and shop services, plus an Angular frontend.

Time Catcher 2.0 · React Native, Expo, JavaScript · May 2025 – Jun 2025

- Built and published a one-tap iOS time tracker; earned 5-star reviews in its first week.

inTune Pitch · Swift, iOS

- Built and published a free chromatic tuner with real-time pitch detection and cents display.

Education & Certifications

B.S., Recording Arts Technology — Full Sail University, Winter Park, FL · 2015

Full Stack Engineer Certificate — Codecademy · Jun 2024 – Sep 2024

Software Engineering Coursework — App Academy · Nov 2023 – Apr 2024
